The system is available in three track versions, each offering different installation options: recessed, surface mounted, or suspended. With various lighting fixtures available, from accent lighting to general lighting, designers can create numerous configurations to suit a wide range of applications. The user-friendly system allows the final user to easily reposition the luminaires without tools to meet changing needs easily and safely since the entire system operates on low voltage. Luminaires are available in 2700K, 3000K, and 4000K, providing the perfect colour temperature options. They also feature CRI90 for excellent colour reproduction, together with a UGR.
