

**Product:** GRANVIA / GRANVIA PRO TRUNKING RAIL 34 7X WIRES FOR DALI 3 CONNECTORS / L-4500MM

**Index:** 19.4377.0023.34

## Description

The trunking rail, that is a part of the GRANVIA linear lighting system is designed for surface-mounted or suspended installation. The rail is available in three lengths for greater flexibility: 1.5m, 3m and 4.5m. The connection between the two rails is made without tools, which, together with the long dimensions, minimises installation time for installers. It is a top-quality steel profile (Arcelor Mittal), which guarantees its protection in industrial and commercial spaces. The rail is available in 4 wiring options (5, 7, 9 and 11 wires), which allow the connection of three phases to system components equipped with a traditional on/off driver, and the possibility of connecting components equipped with a DALI driver, emergency system, sensors, etc.
